Abstract

This report does not actually discuss the topic in question, but rather shows how to write an honours thesis using a prettier layout than the default L^AT_EX version. Note, I know there are bugs in the style file (e.g. when you use *really* long titles), anyone who can fix them will have my full appreciation. Please do email me if you improve it, that way future generations can benefit.

Acknowledgments

Karsten Tinnfeld for the original style sheet that I hacked.

Contents

1	Introduction	1
2	Related Work	3
2.1	Section Example	3
2.1.1	Sub-section Example	3
3	Design and Implementation	5
4	Evaluation	7
5	Discussion and Future Work	9
6	Conclusions	11
	Bibliography	13
A	An Appendix Chapter	15

1

Introduction

“I like Software Engineering, it makes HCI look like hard science” – Michael JasonSmith

2

Related Work

It's always good to reference super-stars of your research area [1].

2.1 Section Example

It's pretty easy to make a section.

2.1.1 Sub-section Example

It's three characters harder to make a sub-section.

3

Design and Implementation

HCI is all about good design.

4 Evaluation

HCI is all about good evaluations.

5

Discussion and Future Work

\LaTeX really isn't that hard.

6 Conclusions

In conclusion and finally, I'd like to conclude that...
